Professional Work Experience

Parson | Engineering Supervisor | New York, NY, February 2023 – Present
● **Document Control Supervisor:** For critical infrastructure projects ranging from $1M to $2B projects throughout the NYC area, drafted the framework for which documents should flow amongst different contractors and subcontractors. Worked with a team of 2 senior level engineers brainstorming ways to track document workflow accurately.
● **Document Review:** Reviewed documents for accuracy and conformance to building codes and project specifications.
● **Database Engineer:** Used Microsoft Access to create a front and back end to track incoming documents and the relevant data.
● **Project Engineer / Field Engineer** Performed civil engineering supervisor in the field, requiring strong leadership/collaboration skills.

Senior Special Inspector | Terracon Consultant |Moorestown, NJ, July 2023 – February 2023
● **Project Engineer / Field Engineer:** Performed specialized inspections for large clients such as Amazon, Walmart, and Target. Monitored the work to ensure all items were inspected according to the project timeline. Performed Steel and Bolting inspections whiles serving as a welding inspector apprentice.
● **Document Review:** Reviewed project drawings, documents, and scope of work to understand contract specifications and requirements.

Senior Special Inspector | 2020 Engineering | New York, NY, June 2021 – July 2023
● **Project Engineer / Field Engineer:** Performed pile drilling, steel reinforcement, structural masonry, and concrete placement inspections.
● **Document Review:** Reviewed project documents to communicate to other inspectors the scope of work and the requirements. Created, modified, and accepted RFI, NCR, and inspection reports.

Software Development Portfolio

Maps | https://marvincampbell21.github.io/mapfront-end-app/

● Worked with a team of two other developers to develop a front-end application where users can learn about different countries by using a map api and countries facts api. Severed as the project manager and lead css programmer.

● Developed using JavaScript, HTML, CSS

Github Repositories |Insert project link

● Worked with another developer to create an interactive front-end application to fetch user repositories based on their github user name. Severed as developer and css/UX designer.

● Developed using JavaScript, HTML, CSS, React, Redux

Chat App | Insert project link

● Worked with a team of two other developers to create an interactive chat application. Severed as the project manager and lead UX designer.

● Developed using JavaScript, HTML, CSS, React, Redux

Awards / Accomplishments
